

Jennifer George
Executive Director
ARCA

Jennifer

Our education program has now been in effect for over 3 years and we need to advance the program. We need more people to get involved and assist in teaching these classes.

Our next step is twofold.

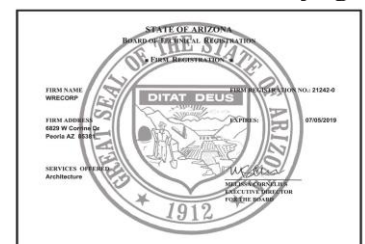

1. Provide the applicator classes, which will enable the individuals to take the courses necessary to achieve accreditation in a specific trade, such as Shingles, Tile, Single Ply, Coated Foam, etc. This process will include as an example; a course in single ply which would include, classes on TPO, PVC, (EPDM & CSPE to a lesser degree) insulation, flashings, adhesives, mechanical attachment and tools necessary.
2. We need to open up this program to Spanish speaking personnel. To do so we need to ask for members that are willing to teach these classes in Spanish.

Classes:

1. BUR, Modified Bitumen, Single Ply, Coated Foam, Shingles, Tile, Metal, Insulation, Metal & Liquid Flashings, Adhesives, Coatings, Waterproofing, Deck Coating, Estimating, Markup & Profit, Plan Reading, Construction Documents & Wooden Shingles & Shakes
